

Organisations of all shapes and sizes benefit from leecareplus™.

Whether your facility has 10 beds or well over 1,000, we've got you covered.

• Smaller Facilities

Our customised package allows you to control your organisation through a single computer or local network.

You get:

- A user-friendly interface
- A suite of time-saving forms and features to keep your organisation running smoothly
- A Permission feature which allows you to control what information your staff have access to
- A Module Building option which lets you add modules as your staff confidence increases

• Larger Organisations

The leecareplus™ Enterprise Management solution is specifically designed to meet the needs of large scale organisations.

Key feature include:

- An enterprise -wide data system which lets you access data from multiple facilities in different geographic locations
- Advanced Security Permissions feature to control information access amongst staff
- A state of the art SQL database, C#, .net2 interfaces, and all MS Windows and Citrix platforms
